

# Mark your calendars for a Tuesday night nutritional power seminar in South Jordan! (Coming soon to St. George, UT)

In preparation for my upcoming book I have been engrossed in an incredible amount of research. My research is on a number of health topics but one in particular section has been to find an outstanding nutritional supplement. Not just another of the countless mediocre, over-priced, currently available but a truly AMAZING supplement!

It has been a difficult journey of discovery.

As a country and a culture, we are bombarded with “would be...could be...should be,” good for you pills and potions. Don’t get me wrong, there are some great products out there, however, there are a number of poorly produced, poorly researched products that are well marketed. This leaves people confused and often misled.

In my research, my criteria were simple, yet hard to find:

- A product created by a **Reputable, Financially Sound Company**.
- Outstanding product **Research**.
  - Laboratory studies done to the cellular and DNA level.
  - Documented human trial studies.
  - Patents on research and findings.
  - Shown to benefit with no adverse side-effects.
- **Guarantee**
  - A 100% money back guarantee. If you or I recommend this product to a patient, friend, or loved-one, they can try the product for 90 days. If they don’t feel an amazing change for the better, they can get 100% of their money back!
  - (Let’s see Tylenol, Claritin, Viagra, or any other consumable products do that!!)
- **Simple** for people to take.
  - Not 6 or 8 “horse pills” per day.
  - An all-in-one product if possible thus reducing the need for people to buy 5 different bottles in an effort and get the right combination of supplements they need.
- Full spectrum of vitamins, minerals and **Loaded with Anti-Oxidants**.

- Designed to be a 'super-food' or super cell food to help humans get the nutrients they need on a cellular level.
  - Designed to nourish, restore, fortify and vitalize the new cells that are constantly replacing dying cells. (We generate 300 million new cells per day)
- **Liquid Based** for maximum absorption.
    - The Physician's Desk Reference (page 1542) shows that vitamins and minerals in a pill form are only 10 to 20% absorbed by the body. In contrast vitamins and minerals in **liquid nutritional supplements form are up to 98% absorbed.**
- A decent **Price-Point.**
    - Something most everyone can afford.
    - Who needs to spend \$100 or more per month for an individual supply of supplements? It is just not necessary.
- **Direct Shipping.**
    - A product that I can recommend or prescribe for patients but the doctor doesn't have to stock on his/her shelves.
    - If you like it or recommend it to others, you don't need to stock pile it either!
1. Well, I FINALLY FOUND WHAT I WAS LOOKING FOR!! I will be in St. George this January '08 to offer a brief but informative 45 minute workshop and give out gift samples of Univera products. I will hold TWO separate meetings.
    - To be announced.
1. **That is right, I will give out FREE samples of the product for you and your friends to try at the meeting.**
  2. For DOCTORS ONLY. Following the Friday night meeting there will be a Q&A conference call with the head of product research, Stephen Cherniske RSVP is necessary to make sure we reserve enough slots for the doctors to call in. <http://us.univera.com/story/science/Stephen-Cherniske>

This powerful, wholesome, anti-oxidant packed super supplement, (I like to call "high-octane cell fuel") will blow your mind without breaking your pocket-book. <http://us.univera.com/story/science/Xperia-Renewal-You-Can-Feel>

**Join me and invite your friends,  
Every other Tuesday nights in South Jordan**

RSVPs are not necessary but appreciated. (801) 446-5100 Office
